OUR OPPORTUNITY.

Many of us were sorely disappointed when the Dixie Highway was not routed via Crossville, but the men or people who are really worth while never give up or lie down and say, "it can't be done."

Opportunity is again knocking at our door or, to say the least, we have a chance to get the Dixie highway routed this way yet.

Recently a company of men, comprising about fifty automobile loads, left Chicago to make the trip to Miami, Florida, over the proposed Dixie Highway route. All went very well until they reached Nashville. A banquet was awaiting them in Chattanooga at six o'clock of the day they left Nashville. Owing to the bad roads encountered the company did not reach Chattanooga until four o'clock the following morning. As a result it seems the routing of the Dixie Highway that goes via Nashville is sure to be changed. To just what extent no one seems able to state at this time.

If our people would show the proper spirit in building the Dixie Highway via the central route through this county there is a very reasonable probability that this could be made the official route as far as Crossville and then follow the Memphis-to-Bristol Highway to Nashville. It would be little further than the proposed way.

The Memphis-to-Bristol Highway is almost sure to be routed via Lebanon, Cookeville and Monterey and for the Dixie Highway to be routed this way and go on to Nashville over the Memphis-to-Bristol would present a line that would be only a few miles longer than the proposed one and would give tourists some of the most beautiful scenery in the south, a cool and pleasant route in the summer time and a route that could be traveled with much more ease in the winter.

Action should be taken looking to that end. There is a very strong probability that if the proper steps were taken we could secure the official Dixie Highway, but without energetic action it will go to more wide-awake and determined people.

Opportunity does not always knock twice at the door of any people or individual and unless we take some energetic action we will be little farther on the way to development of this splendid section twenty-five years from now than we are at present.

ARE YOU EDUCATED?

A professor of the University of Chicago has evolved a series of test questions for the educated which, he avows, are the best evidence of a real education. If you can answer "yes" to all the questions you are truly educated, the professor says. Here are the questions:

Has education given you sympathy with all the good causes and made you espouse them?

Has it made you public spirited?

Has it made you a brother to the weak?

Have you learned how to make friends and keep them?

Do you know what it is to be a friend yourself?

Can you look an honest man or pure woman in the eye?

Do you see anything to love in a little child?

Will a lonely dog follow you in the street?

Can you be high-minded and happy

HELPLESS AS BABY

Down in Mind Unable to Work, and What Helped Her.

Summit Point, W. Va.—Mrs. Anna Belle Emey, of this place, says: "I suffered for 15 years with an awful pain in my right side, caused from womanly trouble, and doctored lots for it, but without success. I suffered so very much, that I became down in mind, and as helpless as a baby. I was in the worst kind of shape. Was unable to do any work."

I began taking Cardui, the woman's tonic, and got relief from the very first dose. By the time I had taken 12 bottles, my health was completely restored. I am now 48 years old, but feel as good as I did when only 16.

Cardui certainly saved me from losing my mind, and I feel it my duty to speak in its favor. I wish I had some power over poor, suffering women, and could make them know the good it would do them."

If you suffer from any of the ailments peculiar to women, it will certainly be worth your while to give Cardui a trial. It has been helping weak women for more than 50 years, and will help you, too.

Try Cardui. Your druggist sells it.

in the meanest drudgeries of life? Do you think that washing dishes and hoeing corn is just as compatible with high thinking as piano playing or golf?

Are you good for anything yourself?

Can you be happy alone?

Can you look out on the world and see anything but dollars and cents?

Can you look into a mud-puddle by the wayside and see a clear sky?

Can you see anything in the puddle but mud?

LIFE.

There are many wonderful things in the world. The greatest wonder is life.

The gaseous, mineral, vegetable and animal kingdoms, are simply a classification of the atmosphere, the earth and its products.

The first great characteristic of life is growth. This is accomplished by means of organs created for the purpose. Vegetable growth is involuntary, but it is very completely and skillfully arranged.

Animal life is partly controlled by each animal itself. Each possesses more or less knowledge and will power. It has been practically proven that animal life has been developed from plant life, but the great length of time, power and skill necessary to the process are hardly half understood. How motion, feeling, will and knowledge could in any way be developed from vegetable life, far surpasses our ability to understand and explain. That it has been done, is now well known.

The greatest wonder of all is the development of all animal life. First from lower to higher orders or kinds. Finally the extremely great development of man, himself, from an ordinary animal life to his present physical, intellectual and spiritual condition. This is the wonder of wonders. Long ages of time have been consumed in the process. It is ever going on, irregularly, but surely.

THE NEXT BEST THING TO THE PINE FOREST FOR COLDS IS—

Dr. Bell's Pine-Tar-Honey which goes to the very root of cold trouble. It clears the throat and gives relief from that clogged and stuffed feeling. The pines have ever been the friend of man in driving away colds. Moreover, the pine-honey qualities are peculiarly effective in fighting children's colds. Remember that a cold broken at the start greatly removes the possibility of complications. 25c. 1
